Leading the Industry in Cargo Compliance and Security Solutions.

To meet the changing security needs of today's global trade community, Sandler & Travis Trade Advisory Services (STTAS) and Intertek have partnered to provide security solutions that can give your company the competitive edge necessary to reduce supply chain risks associated with cross-border transportation.

Our seasoned team of customs specialists, in-country field inspectors and information technology experts all possess an in-depth knowledge of legal and technical issues associated with international trade security. Our experts utilize proven business procedures and proprietary technology to identify supply chain vulnerabilities and to develop innovative solutions that will assure operational efficiency in compliance with evolving U.S. Government supply chain security requirements.

Our services include:

- Comprehensive C-TPAT application services
- Border security education seminars
- Trade compliance reviews
- Cargo-related inspection solutions
- Loading and unloading supervision and container sealing

A Comprehensive Approach to Managing International Trade Security Verification.

The Global Security Verification Program (GSVP) is designed to address a wide array of border security issues tailored to meet your needs.

- Identification of supply chain vulnerabilities to reduce security risks associated with cross-border transport of goods;
- Development of customized security programs designed to expedite arrival of goods at destination markets;
- Verification of foreign supplier manufacturing and warehouse security procedures designed to evaluate the status and effectiveness of key security measures;
- Validation of manufacturing/supplier and corporate security measures against Government guidelines and prevailing commercial standards;
- Recommendations for enhancing foreign supplier security procedures;
- Security enhancement training for foreign suppliers; and
- Summary of reports of security issues and best practices designed to client specific needs.

To accomplish these objectives, the GSVP offers:

On-line Application

- A simple, on-line application process at www.importsecurity.com

On-site Assessment

- Comprehensive manufacturing supply chain security review
- Expert, on-site foreign facility security inspection/verification
 - Facility Personnel Interviews
 - Relevant Document Verification
 - Factory Security Inspection

Reports and Data Analysis

- Guidance in enhancing security measures and procedures
- Access to aggregate data reports collated by factory, industry, region, and continent
- Compilation of manufacturing facility security best practices

Resource Information

- Geographic list of registered facilities meeting and/or exceeding U.S. Government security recommendations through web-site publication at www.importsecurity.com
